SUMMARY

Self-taught Full Stack Developer who independently built and launched MiluAI, a live AI chatbot, using the MERN stack, Next.js, and TypeScript. Comfortable owning a product from idea to production, including integrating LLM APIs and setting up analytics and monitoring. Set to begin a B.Sc. in Information Systems in October.

TECHNICAL PROJECTS

- **MiluAI, AI Chatbot for Israeli Reservists**
  - Built and deployed this chatbot alone, live since early 2026.
  - Used Next.js, TypeScript, Tailwind, and MongoDB, connected to the Claude API.
  - Found accuracy issues in the AI's responses and identified RAG through MongoDB Atlas Vector Search as the right fix going forward.
  - Set up the production side too: PostHog for analytics, Sentry for error tracking, Resend for email, and PWA support.
- **SynchroMind AI (Task Management**
  - Developed a high-performance task management system using Next.js 16 and Redux Toolkit, improving user workflow efficiency.
  - Engineered a cross-platform "Shift Approval" feature, resolving complex mobile compatibility issues and ensuring 100% responsiveness.
  - Integrated AI-driven insights to automate task prioritization and reduce manual planning time.
- **Professional Portfolio**
  - Designed and developed a high-performance personal brand gateway showcasing technical proficiency and "vibrant" UI/UX.
  - Achieved high performance scores by implementing asset optimization and code-splitting techniques.
  - Tech Stack: React, Framer Motion, SCSS, Cloudinary API
